Mumbai: The Covid-19 pandemic has helped the edtech sector grow exponentially which has led to a huge number of hires in the sector, but experts believe that with the opening of schools this upward trajectory is likely to consolidate. The pandemic has drastically changed the way people teach and learn, and funding for edtech has remained bullish leading to the adoption of advanced technologies, growth in both revenue and hiring, Aditya Mishra, director of HR and services, told PTI. CEO of CIEL.

“We estimate that there are more than 10,000 active openings at all levels and permanent roles in the industry. In addition to these, there are at least 50,000 temporary job openings in the edtech sector,” he noted.

However, the intensity of the action in terms of hiring, investment and new enrollment is expected to decrease somewhat as the physical model begins to function normally, he said.

“The number of new startups in space will eventually decline. Even as growth rates decline, the momentum will continue as numerous schools and students have yet to be covered by edtech.

“The new education policy (NEP) will continue to act as a facilitator for the growth of the sector. In the years to come, we will see a consolidation of the sector which will give rise to some important players for each segment within edtech”, He he said.

Shantanu Rooj, CEO and founder of Edtech, said that the Indian edtech sector has attracted huge capital investments and this will continue for the next few years.

STARTUP ROCKSTAR IN 2021
